SKILLS

Python3.11; C++; Tensorflow; PyTorch; JavaScript;
TypeScript; Swift; Kotlin; other backend languages as
appropriate

OBJECTIVE

To change to world, through artificial
intelligence

EXPERIENCE

Software Engineer | PDFSage | Feb 2025 - Present

Created the world's best, by a very wide margin, hate-crime prevention smart filter model, that's able to tell differences between smart and non-offensive use of hate crime words, as well as words syntactically embedded related to hate words, such as "black people."

Existing social media platforms could only dream of achieving anything close to similar, and this model is deployed on both cloud and via TFLite.

Creating the world's best and most powerful and most efficient PDF rendering and editing engine, however it could also do photos, etc.!

Software Engineer | PDFSage | Jan 2025 - Feb 2025

Published 4 different iOS applications, developed Exploit LLM, featuring exploit scanning and deployment "Googolbot", created 2 Amplify Next.js websites, and experimented with numerous other technologies successfully

EDUCATION
